Full Stack Web Developer with nearly three years of experience in developing end-to-end web applications using JavaScript and TypeScript within React, Remix, Next.JS, and Angular frameworks. Skilled in maintaining and developing Node.js-based backend systems and employing Test Driven Development methodologies with Jest, RTL, and Cypress testing frameworks. Consistently follows Agile principles and practices during the software development process. Dedicated to continuous learning, constant advancement of expertise, and acquisition of new skills and technologies.

PROFESSIONAL EXPERIENCE

SKILLS

JavaScript
TypeScript
React
Remix
Next.js
Angular
Tailwind
Jest
RTL
Cypress
Node.js
SQL
GraphQL
PostgreSQL
REST API
AWS SNS
AWS Lambda
AWS S3
DynamoDB
MongoDB
Express
Koa
Mongoose
Docker
Kubernetes
TDD

EDUCATION

Full-Stack Web
Development
CareerFoundry

MA Linguistics
University of
Colorado at
Boulder, USA

Full Stack Web Developer | *The Sole Supplier* | June 2022 –present

- Produced high-quality solutions by proficiently writing, testing, and debugging software across the entire tech stack.
- Enhanced the performance of the web application by successfully migrating, adapting, and refactoring reusable components from React to Remix frameworks, resulting in making the application more efficient and performant.
- Contributed to the stability and scalability of Node.js codebases while playing an active role in defining robust systems architecture.
- Ensured software reliability and quality by rigorously following the Test Driven Development approach, while leveraging a variety of testing frameworks.
- Enhanced the customer checkout flow experience by collaborating on the design and implementation of a more intuitive UX/UI, resulting in improved usability and conversion rates.
- Optimised website performance and visibility by meticulously setting up pixel tracking, Google Analytics integration, and addressing SEO challenges.
- Fostered collaboration across teams by actively engaging with product owners, designers, and engineers in a dynamic Agile environment.

Full Stack Developer Student | *CareerFoundry* | June 2021 –April 2022

- Completed an intensive, project-based full stack development course led by seasoned mentors, resulting in a comprehensive skill set aligned with industry standards.
- Spearheaded the design, documentation, and integration of a REST API with user interfaces constructed using React and Angular frameworks, ensuring seamless communication and functionality.
- Engineered fully operational end-to-end applications employing diverse technologies, including serverless architecture and MVC design patterns, delivering robust and scalable solutions.

WEB DEVELOPMENT PROJECTS

Full Stack Developer Student | *CareerFoundry* | June 2021 – April 2022

Successfully delivered a range of projects showcasing proficiency across various technologies in both front end and back end software development. Acquired a versatile skill set suitable for addressing the diverse challenges in software engineering.

- Employed Angular and Material UI to design user interface, as well as integrating Angular Router to establish connections with an SQL server.
- Developed a React Native mobile app by employing the Gifted Chat Library to achieve an intuitive interface and facilitated image and location-sharing functionalities by linking the app with Google Firestore.
- Designed and implemented a React Serverless Progressive Web Application integrated with the Google Calendar API for event management and Recharts for data visualization.
- Built a Single Page Application using the MERN (MongoDB, Express, React, Node.js) tech stack and Bootstrap to achieve a visually appealing interface.
- Engineered a robust REST API for a movie app, employing Node.js with Express for seamless server-side operations, including middleware and user authentication logic.
